INTRODUCTION

WHILE AI AND ITS MANY FORMS HAVE CAPTURED THE ATTENTION OF THE WORLD, MAINFRAMES CONTINUE TO PREVAIL.

THERE ARE ROUGHLY A FEW HUNDRED BILLION LINES OF COBOL LIVE IN PRODUCTION AND A FEW THOUSAND COMPANIES USING MAINFRAMES FOR THEIR ENTERPRISES.

IN THIS BOOK, WE LOOK AT WHERE MAINFRAMES ARE RELEVANT AND WHY MAKING CHANGES TO THE APPS THEY RUN IS A DIFFICULT CHALLENGE.

WE ALSO LOOK AT A RANGE OF APPROACHES AND DISCUSS IN SOME DETAIL A BUSINESS-ALIGNED APPROACH.

MAINFRAME MODERNIZATION IS MORE THAN A TECHNOLOGY PROBLEM AND HOPEFULLY THIS BOOK HELPS YOU SEE WHY.

A BIT ABOUT MAINFRAMES

WHAT IS A MAINFRAME ?

A MAINFRAME IS A DATA SERVER THAT IS DESIGNED TO PROCESS UP TO A TRILLION WEB TRANSACTIONS DAILY WITH THE HIGHEST LEVELS OF SECURITY AND RELIABILITY.

- IBM

WHAT CAN IT DO ?

THIS HIGH-PERFORMANCE COMPUTER CAN PROCESS
MILLIONS OF TRANSACTIONS PER SECOND

WITH A LARGE
NUMBER OF DATA
PROCESSORS

AND A LARGE
AMOUNT OF MEMORY

TODAY'S MAINFRAMES

- PROCESS 18000 MILLION INSTRUCTIONS PER SECOND
- STORE SEVERAL PETABYTES OF DATA STORAGE
- RUN OVER A 100 PROCESSORS
- HANDLE ~70-80% OF PRODUCTION IT WORKLOADS

IT IS BIG

AN AVERAGE 2 BED APARTMENT
IN THE UK IS 1000 SQ FT.

A MAINFRAME COULD
OCCUPY AN AREA
AS LARGE AS
10,000 SQUARE FEET.

TODAY'S MAINFRAMES ARE
A BIT SMALLER, AT 27 SQ FT,
THE SIZE OF A FRIDGE
WEIGHING 1000 KG AND
EVEN SHRINKING

ISN'T IT ANCIENT?

WE DO TEND TO THINK OF MAINFRAMES AS TECH FROM A BYGONE ERA AND POSSIBLY NOT IN USE IN THE AGE OF CLOUD AND AI.

THIS IS, OF COURSE, NOT TRUE.

CONTEXT SETTING

MAINFRAMES OF THE PAST

MODERN CONVENIENCES, HOWEVER, ARE NOT AVAILABLE ON THE MAINFRAMES THAT RUN 40 OR 50 YEAR OLD CODE.

MAINFRAME CODE IS IN
DECADES OLD LANGUAGES..

..NOT FAMILIAR TO TODAY'S
PROGRAMMERS—MAKING IT...

.. HARD TO UNDERSTAND THE
INTENT OF LEGACY CODE

...AND EVEN HARDER TO
MAKE CHANGES TO FEATURES

CHANGE IS DIFFICULT

FIXING EVEN SMALL
ISSUES CAN TAKE TIME

DEPLOYING THE FIXES
ALSO ADDS WEEKS.

MAKING CHANGES TO FULFILL
COMPLIANCE/LEGAL REQUIREMENTS
TAKES MONTHS
AND MUCH OVERSIGHT

CHANGES MIGHT END UP BEING LESS OPTIMAL
LEADING TO BUILDING UP TECHNICAL DEBT

THIS MAKES IT SLOWER AND HARDER TO
BE RESPONSIVE TO CHANGES IN DEMAND

**SOME CONTEXT
ABOUT WHY CHANGE
BECAME A PAINPOINT**

THE CODEBASES

OVER THE DECADES, MAINFRAME APPLICATIONS HAVE HAD CODE ADDED ON BY SEVERAL TEAMS

IN LANGUAGES THAT WERE AROUND AT THAT TIME — THAT STILL RUN TODAY BECAUSE OF BACKWARD COMPATIBILITY —

EACH WITH A RANGE OF APPROACHES TO TECHNOLOGY

RESULTING IN COMPLEX CODEBASES OF MILLIONS OF LINES OF CODE

THE TECHNOLOGY

MAINFRAME APPS USED TO BE HARDWARE SPECIFIC
WITH COMPLEX DEPENDENCIES & INTERACTIONS.

CODE WAS OFTEN EDITED
DIRECTLY ON THE MAINFRAME

THE IMPLICATIONS

ALL THESE FACTORS CONTRIBUTE TO THE RISK TO ORGANISATIONS

SLOW INNOVATION / BUSINESS AGILITY

HIGH OPERATIONAL COSTS

HIGH COMPLIANCE / SECURITY / LEGAL COSTS

ON MODERNIZING MAINFRAMES

WHAT IS MODERNIZATION ?

MAINFRAME MODERNIZATION

IS IT ABOUT MODERNISING
OR UPGRADING THE HARDWARE?

THAT WOULD BE
HARDWARE MODERNIZATION
AND

OUT OF SCOPE
FOR THIS BOOK

IS IT ABOUT UPDATING
THE APPLICATION SOFTWARE?

YES! WHEN WE SAY
LEGACY
OR
MAINFRAME } MODERNIZATION

WE USUALLY MEAN
APPLICATION MODERNIZATION

WHAT IS MODERNIZATION ?

MODERN IS NOT ABOUT THE
AGE OF THE CODE OR LANGUAGE

THIS CHANGE IS CALLED MODERNIZATION*

*FOR THE PURPOSES OF THIS BOOK, 'MODERNIZATION' REFERS TO LEGACY MODERNIZATION

WHY MODERNIZE?

THE NEED TO MODERNIZE

MODERNIZATION IS
NOT JUST ABOUT
OLD AND NEW

IS THE TECH EASY TO USE AND
ARE MY CUSTOMERS DELIGHTED?

HOW SOON CAN I RESPOND TO
CHANGE AND LAUNCH NEW FEATURES?

ARE WE USING TECH THAT IS
SOON TO BE OBSOLETE?

CAN I MINIMISE THE TOTAL

CAN I ATTRACT/RETAIN THE SKILLS
OF PEOPLE THE ORG NEEDS?

WHAT ARE YOUR REASONS?

I DON'T WANT TO
PAY FOR END-OF-LIFE

I WANT TO REDUCE THE
COST OF CHANGE
AND GET BETTER ROI

I HAVE A
COMPETITOR!

I WANT TO CHANGE THE
BUSINESS PROCESS - BUT AM
STUCK WITH WHAT THE SYSTEM
WORKFLOWS FORCE ME TO DO!

I HAVE TO BE
COMPLIANT WITH A
NEW REGULATION

I WANT SHINY
NEW TECH

THE ASPIRATION

LOOSELY COUPLED ARCHITECTURES

WELL ABSTRACTED HORIZONTAL LAYERS

STANDARD LIBRARIES AND FRAMEWORKS - NEWER ONES

RELATIONAL OR DOCUMENT BASED DATA STORES

ENCRYPTION AT REST AND IN TRANSIT

SMALL GRANULARITY TRANSACTIONS

EVENT-BASED RATHER THAN TIME-BASED SCHEDULING

HORIZONTAL SCALING - ADDING MORE NODES
INSTEAD OF UPGRADING THE ONE MACHINE

AUTO SCALING BASED ON DEMAND

PAY PER USE MODEL

HEALTH CHECKS

APP-LEVEL RESILIENCE

. . . AND MORE !

DECIDING VALUE & FIT

WHAT IS USEFUL, VALUABLE
OR FIT FOR PURPOSE IS
A COMPLEX DECISION.

IT IS BASED ON WHAT
THE ORGANISATION NEEDS.
SUCH AS...

... MATCHING COMPETITION

... COMPETITIVE ADVANTAGE

... FASTER PACE OF CHANGE

... CHANGE TO BE CHEAPER

... A LOWER RUN COST

**MODERNIZATION
IS A HARD PROBLEM**

EXPENSIVE

MODERNIZATION PROGRAMS
ARE EXPENSIVE -

MODERNIZATION

DELAYS : SUNK COSTS

THE COST OF MAINFRAMES IS A SUNK COST
BUT IT AFFECTS THE DECISION ON FUTURE SPENDING

DELAYS: GAINS TAKE TIME

IT TAKES YEARS TO SEE GAINS FROM MODERNIZATION.
AND CEOs ARE OFTEN RELUCTANT TO INVEST IN IT.

DELAYS : RISKY & COMPLEX

PERCEIVED TECHNOLOGY RISKS

+ FEAR OF FAILURE

COST OF DECOMMISSIONING

+ COMPLEXITY OF THE LEGACY SYSTEMS

THERE ARE QUESTIONS TO ADDRESS

WHAT'S IN MY MAINFRAME?

WILL I NEED EVERYTHING
IN THE FUTURE?

WHAT SHOULD THE

HOW NOT TO DISRUPT
CURRENT BUSINESS PRIORITIES

WHAT HAPPENS TO

FEELS TOO FAMILIAR

FEELS TOO FAMILIAR

1

MOVE THE WHOLE APP WITH
MINIMUM CODE CHANGE AND MAXIMUM FEATURE PARITY

FEELS TOO FAMILIAR

THIS TAKES TIME AND
IS DEEMED LOWER RISK

IT IS STILL HARD TO TRANSFORM THE BUSINESS WITH THE
LIKE-FOR-LIKE UPDATE

A LIKE-FOR-LIKE UPDATE
STILL SUPPORTS
YESTERDAY'S BUSINESS

THE LEGACY STILL EXISTS
& USES RESOURCES

FEELS TOO RADICAL

3

CUSTOM BUILD AN APP FOR YOUR BUSINESS
ON A NEW TECH STACK

FEELS TOO RADICAL

THIS TAKES TIME AND
IS DEEMED HIGHER RISK

THE LEGACY
IS RETIRED

CUSTOMER VALUE
IS IMPROVED

COST OF CHANGE
IS REDUCED

BUSINESS IS EASIER
TO TRANSFORM

DELIVERY IN LARGE INCREMENTS WON'T ALLOW THE BUSINESS
TO SEE RETURN ON INVESTMENT. MOMENTUM IS HARD TO
MAINTAIN. IT MAY END IN ABANDONING THE INITIATIVES.

PRIORITISING CAPABILITIES

SIMPLIFIED DECISION PATH

BUILD

WHAT IS BUILD?

WRITE CUSTOM SOFTWARE IN A NEW STACK

WHY BUILD?

THIS IS A DIFFERENTIATING CAPABILITY AND IS HIGH VALUE

BUY

WHAT IS BUY?

CHOOSE A COMMERCIALY AVAILABLE SOLUTION

WHY BUY?

PROVEN PRODUCT EXISTS AND NEEDS LITTLE CUSTOMISATION

REHOST

WHAT IS REHOST?

'LIFT AND SHIFT'

WHY REHOST?

KEEP THE CURRENT BEHAVIOUR LOWER OPERATIONAL COSTS

RETIRE

WHAT IS RETIRE?

STOP USING AN APP. SUNSET. DECOMMISSION.

WHY RETIRE?

BUSINESS FUNCTION AND/OR APPLICATION NOT IN USE

CAPABILITY MAY BE ONLY PROVIDING DIMINISHING RETURNS

CAPABILITY MAY HAVE BEEN MODERNIZED.

STAY

WHAT IS THE STAY OPTION?

MODERNIZE IN PLACE BY ADDING VERSION CONTROL
AND CONTINUOUS DELIVERY PIPELINES.

WHY STAY?

FUNCTIONALITY IS LARGELY STABLE / ONLY MINOR UPDATES
INTEGRATES TO OTHER SYSTEMS

CHOOSING TO MODERNIZE

BREAKING UP THE PROBLEM

ANY OF THESE DECISIONS
STILL REQUIRE THE PROBLEM TO BE 'SMALLER'.

DURING THE CAPABILITY MAPPING,
THE TEAM WOULD HAVE

IDENTIFIED 'SEAMS'
IN THE CURRENT BUSINESS TECH LANDSCAPE.

"A SEAM IS A PLACE WHERE YOU CAN ALTER BEHAVIOUR IN
YOUR PROGRAM WITHOUT EDITING IN THAT PLACE"

- MICHAEL FEATHERS

FINDING SEAMS

THE IDENTIFIED SEAMS HELP TO TEASE APART
HOW TO BREAK UP THE MAINFRAME APPS
AND PLAN A WAY FORWARD TO BUILD A PLATFORM
WITH THE SERVICES COMMONLY NEEDED.

SEAM - FINDING METHODS

BATCH INPUT
API ACCESS
PIPELINE HANDOFF
DATA CHARACTERISTIC
REQUIRED SIDE EFFECT

FINDING THE FIRST SEAM IS THE FIRST
BIGGEST CHALLENGE. THE FIRST SEAM WHEN
MODERNIZED AND IN USE, SETS UP THE
RHYTHM FOR THE REST OF THE SEAMS

MANAGING RISKS/UNCERTAINTY

THERE ARE WAYS IN WHICH SOFTWARE
ENGINEERING PATTERNS ARE USED

PATTERNS ARE GENERAL REUSABLE AND WELL TESTED SOLUTIONS
TO COMMON PROBLEMS IN SOFTWARE ENGINEERING.

USING AI

HOW CAN AI HELP?

THERE ARE AI TOOLS THAT CAN
SPEED UP UNDERSTANDING LEGACY CODE
AND EVEN AUTOMATING SOME OF IT

GAINING DOMAIN KNOWLEDGE

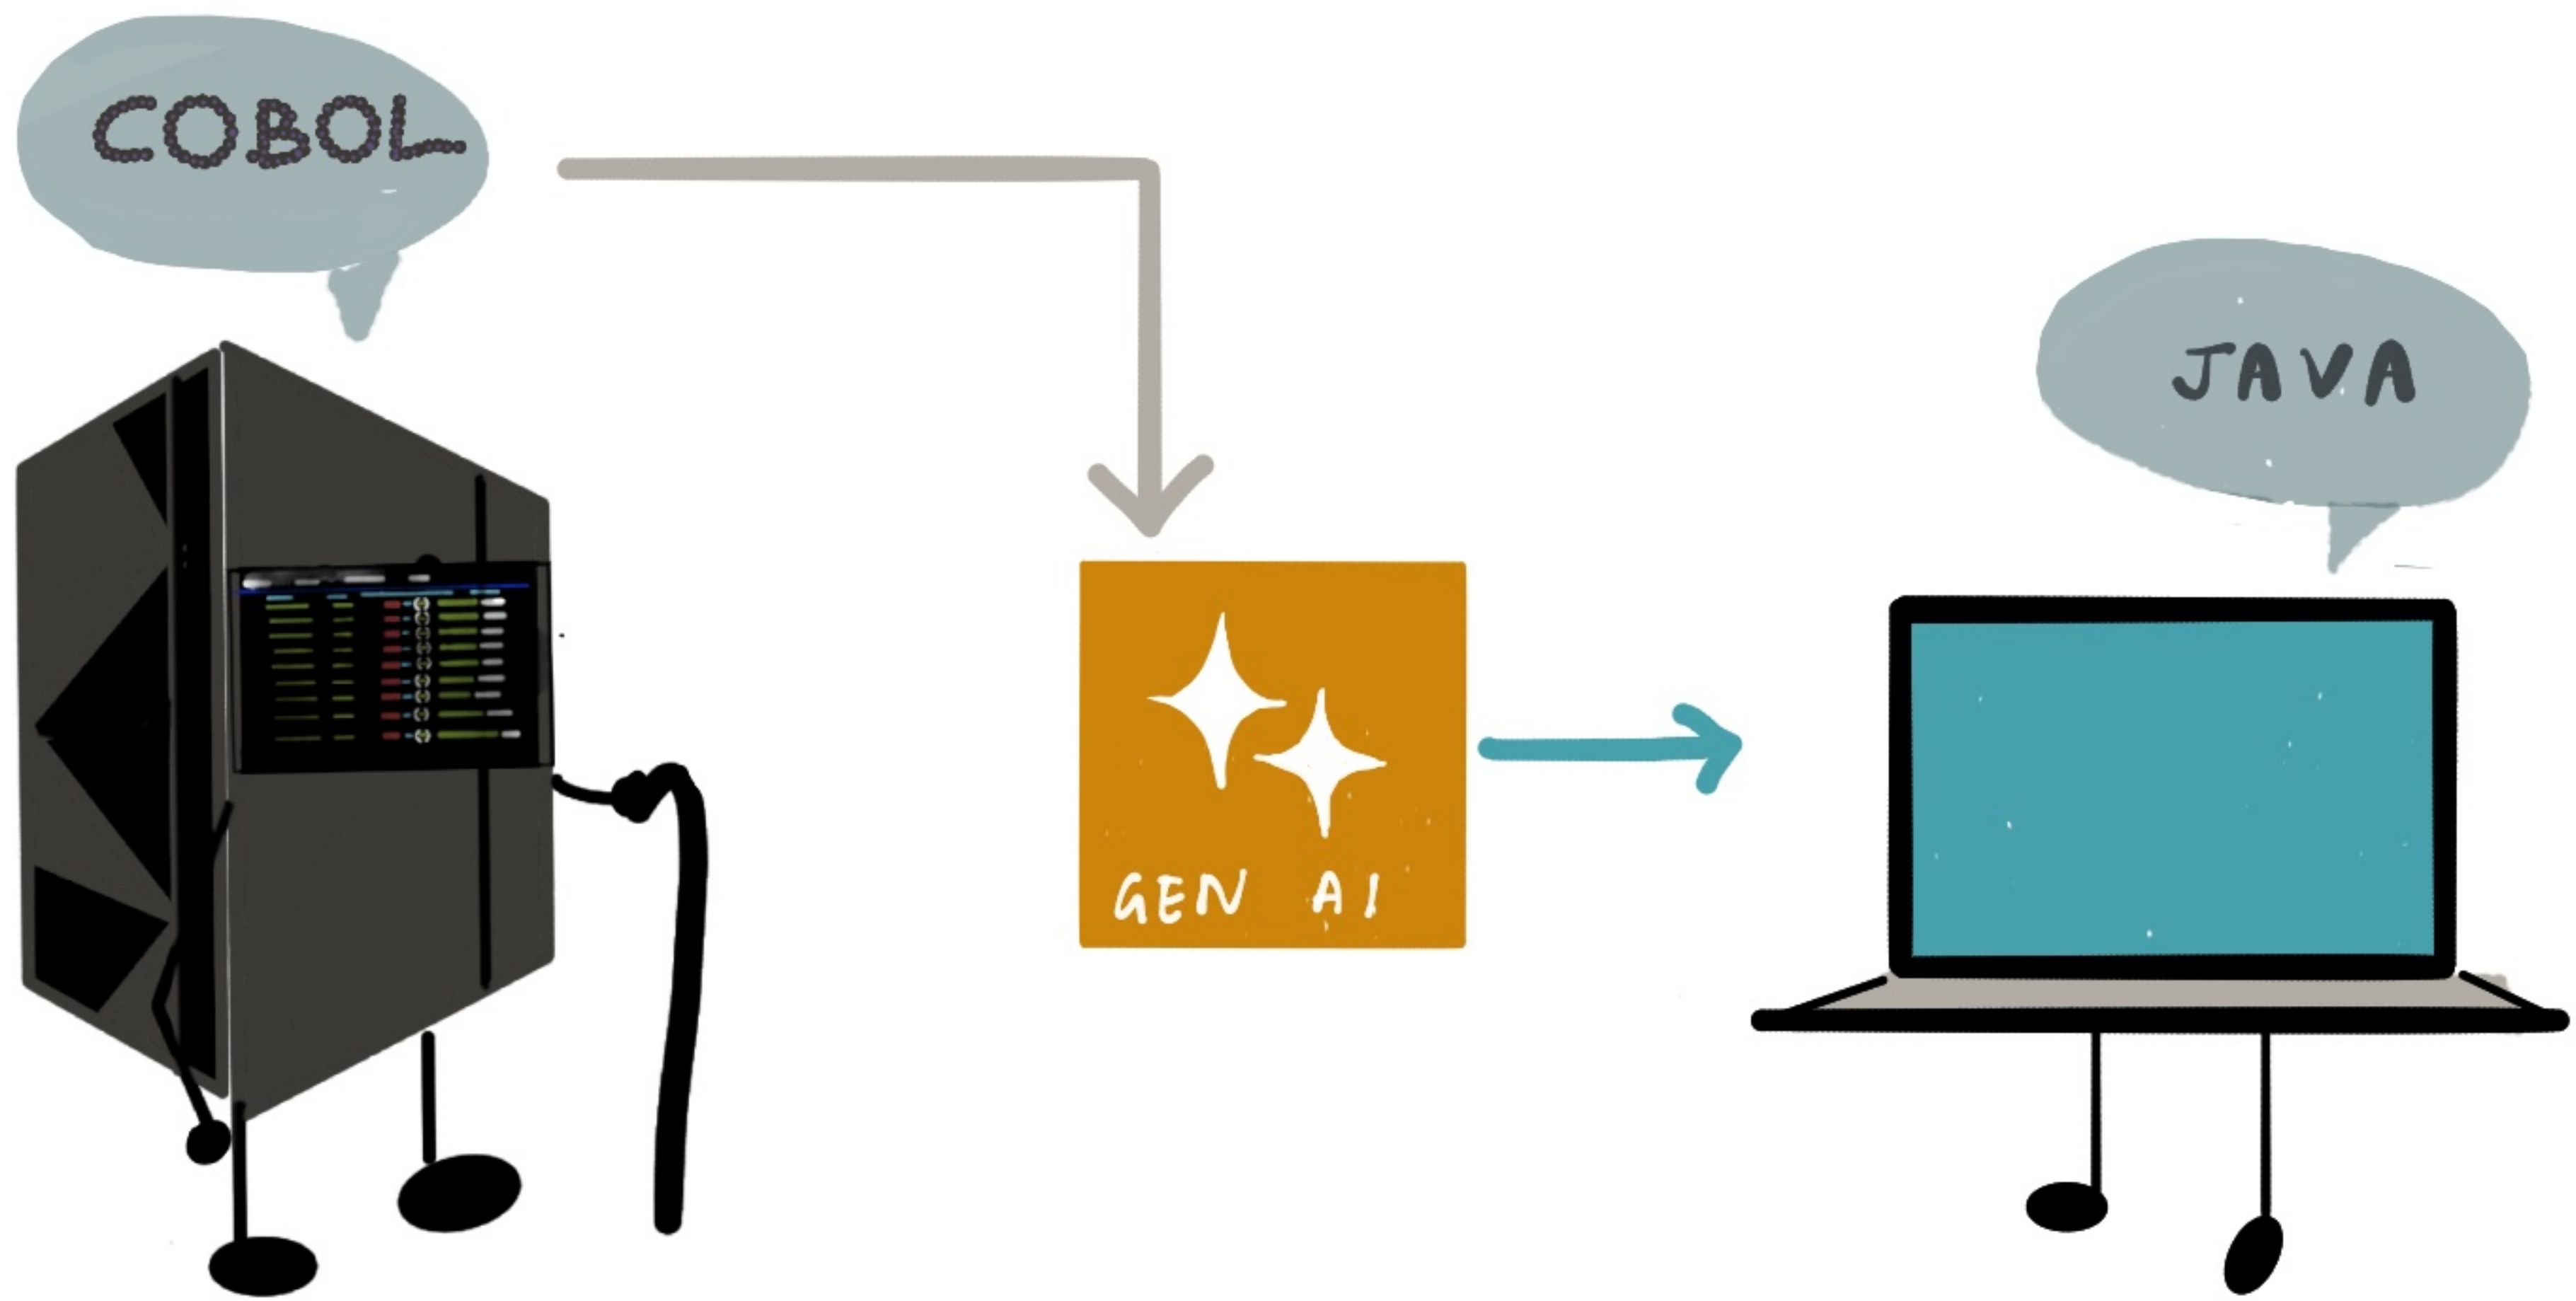

GEN AI TOOLS CAN HELP IN ANALYSING CODEBASES AND COMING UP WITH DETAILED DOCUMENTATION AND CODE SUMMARIES

TIME SAVED

- ON UNDERSTANDING CODE BEHAVIOUR / DOMAIN - INCLUDING UNUSED OR DUPLICATE CODE.
- FOR DEVS WHO CAN DO OTHER HIGHER VALUE TASKS
- IN CREATING KNOWLEDGE BASES
- FOR SUBJECT MATTER EXPERTS IN VALIDATING FUNCTIONALITY AND UNCOVERING MISMATCHES BETWEEN CODE AND EXPECTATION.

CODE GENERATION

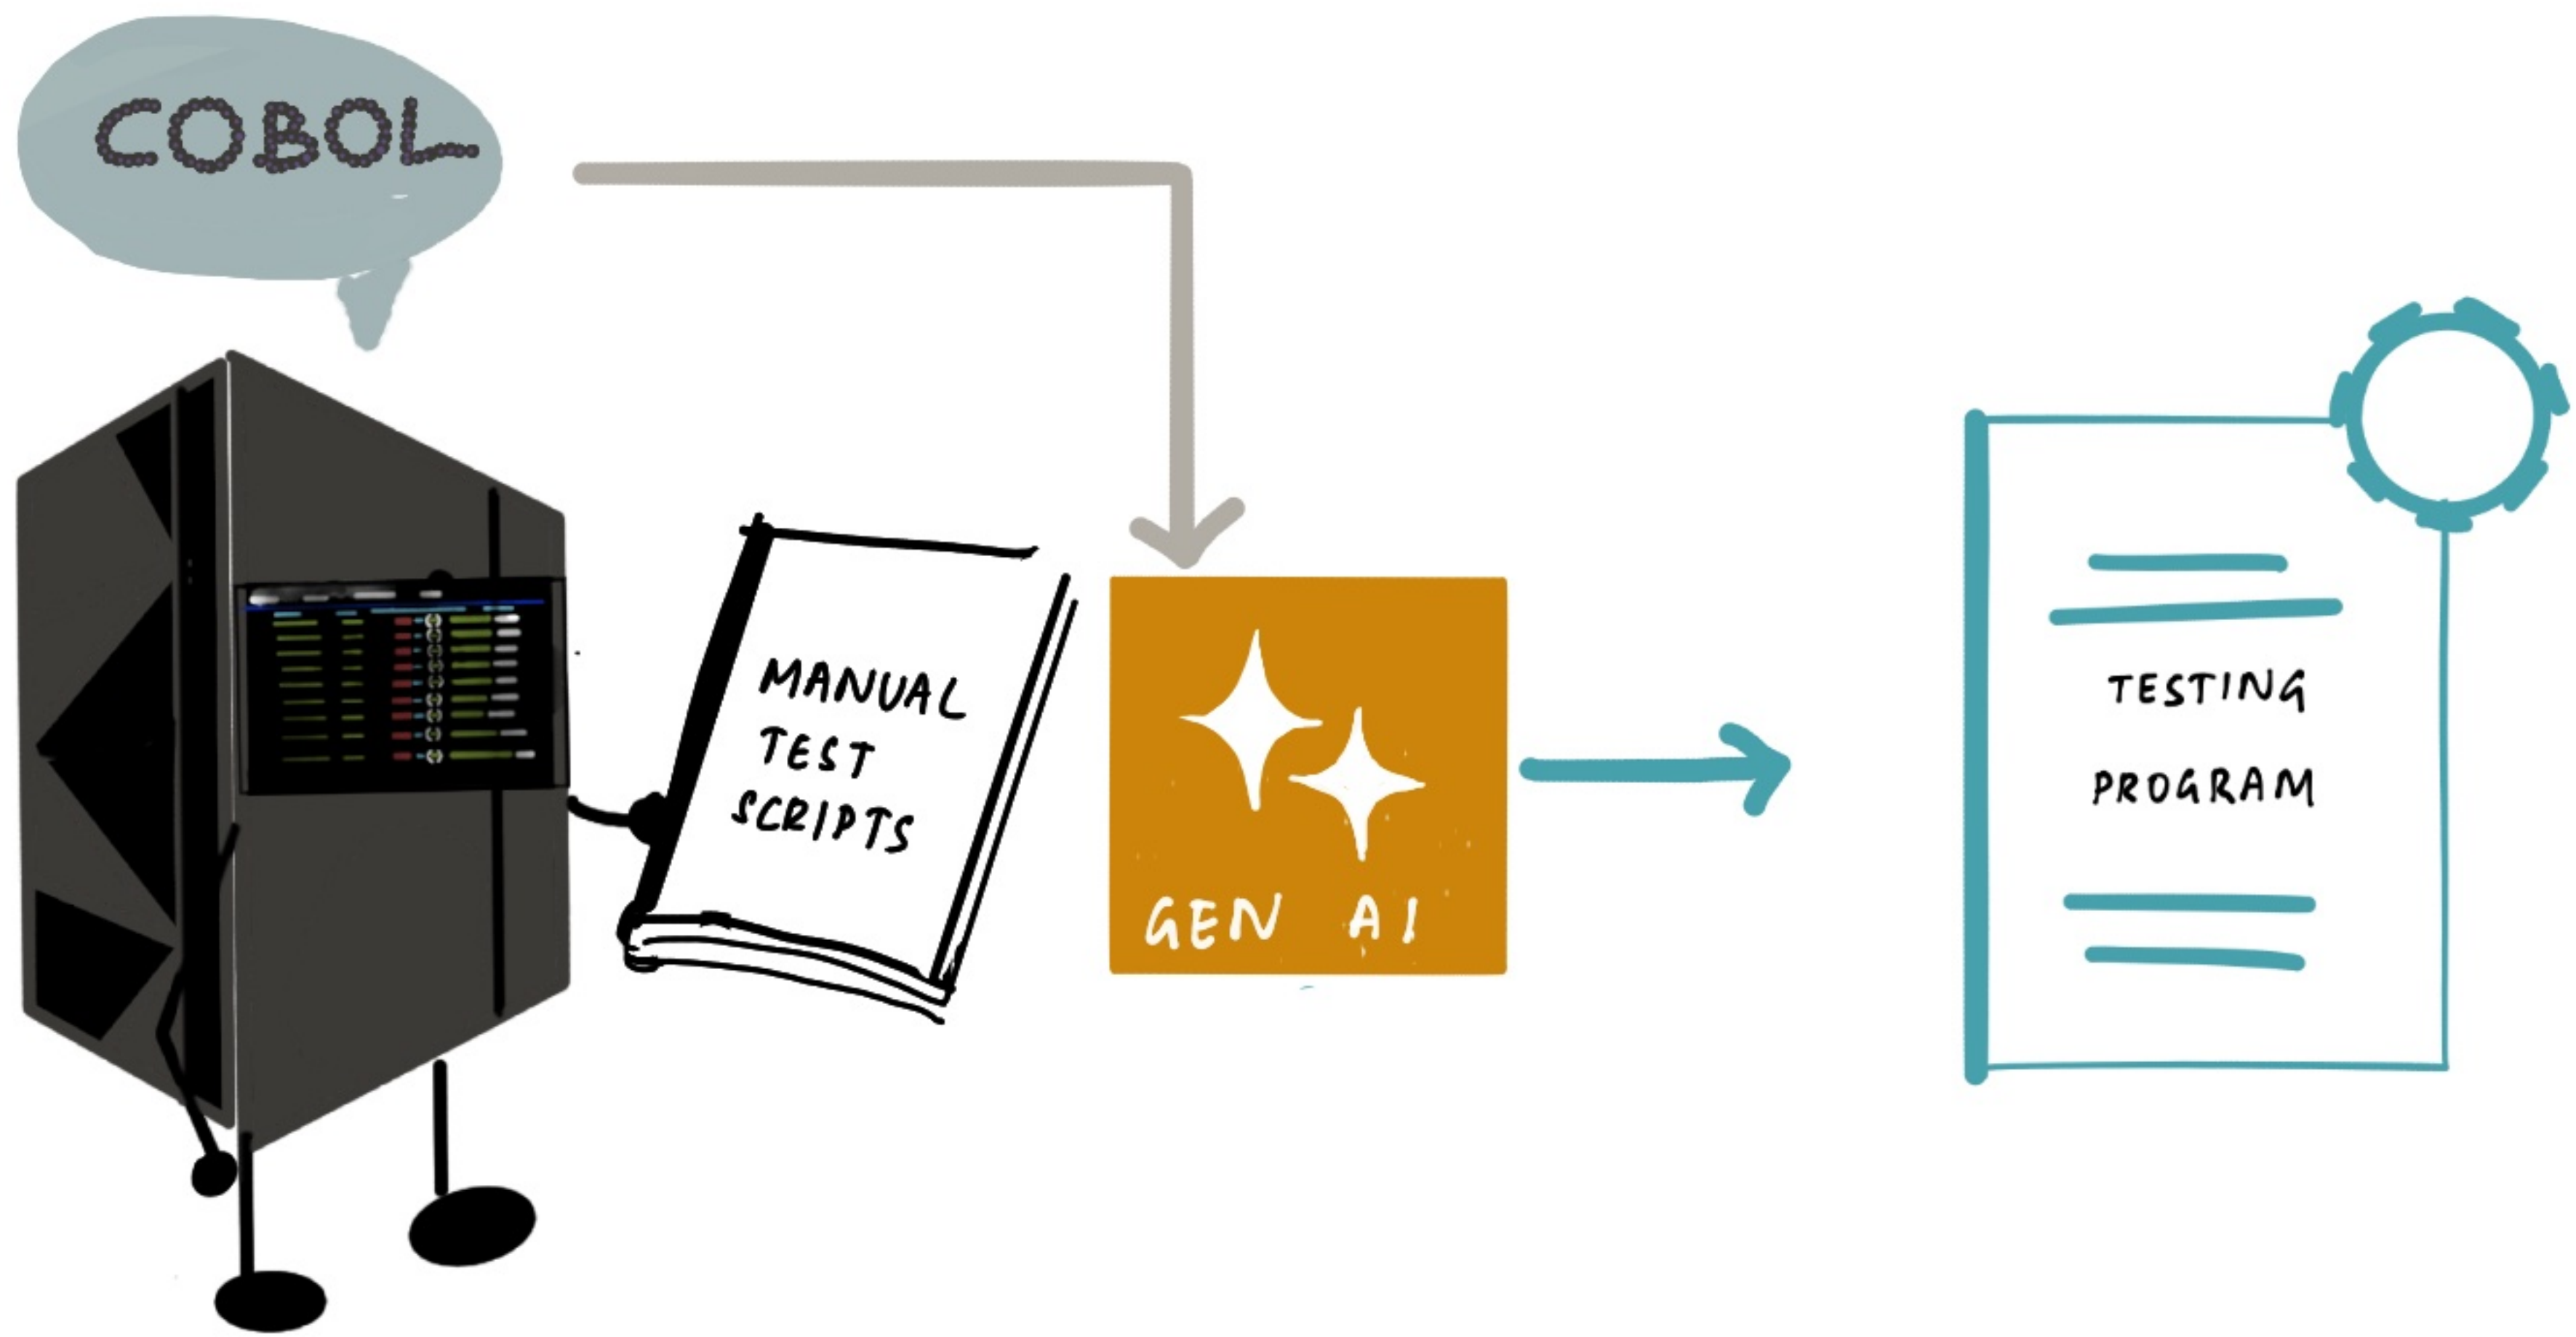

GEN AI TOOLS CAN AID IN GENERATING ENTERPRISE JAVA/C# OR PYTHON FROM LEGACY CODE. IT STILL REQUIRES VALIDATION BY TECHNICAL EXPERTS.

BENEFITS

- SPEEDS UP THE MODERNIZATION
 - ALBEIT WITH POTENTIAL CODE QUALITY ISSUES.

SAFETY NETS FOR IN-PLACE IMPROVEMENTS

GEN AI TOOLS CAN CREATE TESTING PROGRAMS, GENERATE TEST CASES - AS WELL AS FROM MANUAL TEST SCRIPTS. THEY ALSO HELP BUILD MONITORING TESTS.

BENEFITS

- ENABLES IN-PLACE MODERNIZATION
- BUILDS RESILIENCE
- PROVIDES MONITORING AND INSIGHTS

**A BIG BANG
MODERNIZATION
IS NOT NEEDED**

INCREMENTAL MODERNIZATION

THE VALUE / BENEFITS OF
LEGACY MODERNIZATION CAN BE
REALIZED IN INCREMENTAL STEPS
WITHOUT WAITING FOR YEARS

IN FACT, A LOT OF MODERNIZATION
FAILURES ARE THE RESULT
OF A 'BIG BANG' RELEASE

INCREMENTAL MODERNIZATION

THE CAPABILITY MAPPING
HELPS THE TEAM SPOT THE
FUNCTIONS AND SERVICES
COMMONLY NEEDED FOR
DIFFERENT BUSINESS APPLICATIONS.

THIS GIVES RISE
TO THE IDEA OF A
BUSINESS PLATFORM
WITH DECOUPLED SERVICES & DATA

THE TEAM MAKES
ARCHITECTURE AND IMPLEMENTATION PLANS
FOR EACH
CAPABILITY AND SUB-CAPABILITY

EACH (SUB) CAPABILITY
WHEN DELIVERED
IS A 'THIN SLICE' OF VALUE

PROGRESS IS MEASURED
BY THE CAPABILITIES
MODERNIZED

MODERNIZATION AND LEGACY

THINKING IN TERMS OF CAPABILITIES HELPS ORGANISATIONS
GET TO THE TRUE HEART OF MODERNIZATION

'LEGACY' IS NOT ONLY TECHNOLOGY. IT INCLUDES THE OUTDATED
OPERATING MODEL, WHICH IS LIKELY NOT RELEVANT TODAY.
THE OPERATING MODEL HAS TO EVOLVE WITH MODERNIZATION.

MODERNIZATION IS HARD

ORGANISATIONS CREATE VALUE WHEN
PEOPLE, PROCESS AND TECHNOLOGY
COME TOGETHER

LEGACY MODERNIZATION THEN, IS NOT A TECHNOLOGY PROBLEM

OUT OF SCOPE

THIS GUIDE CONTAINS A LOT OF INFORMATION ABOUT LEGACY MODERNIZATION. THERE IS ALSO MUCH THAT IT WON'T COVER SIMPLY BECAUSE OF THE EXPANSE OF THE TOPIC.

WHILE IT EXPLAINS WHAT TECHNOLOGY TEAMS MAY BE THINKING ABOUT, THE BOOK DOES NOT GO INTO IMPLEMENTATION DETAILS THAT A DEVELOPER/ARCHITECT WOULD GO INTO.

FINANCIAL CONSIDERATIONS ARE A LARGE PART OF THE DECISION MAKING PROCESS AND HAS BEEN DELIBERATELY OMITTED AS IT DIFFERS WITH EACH ORGANISATION.

PROGRAM PLANNING IS SPECIFIC TO THE PROBLEM AND IS NOT DISCUSSED HERE.

THIS BOOK ALSO DOES NOT COVER WHAT TO DO IN CASE OF A BUY STRATEGY FOR MODERNIZATION

DECOMMISSIONING IS ALSO A MAJOR ACTIVITY AND DEPENDS ON THE SUCCESS MEASURES DEFINED
