

# Migration Acceleration Program

The AWS Migration Acceleration Program (MAP) is a comprehensive and proven methodology to support customers migrating to cloud and is backed by thousands of successful projects. From one application to a large portfolio, our approach to MAP is scalable and tailored to your business needs. We do more than accelerate sustainable digital transformation – we get you to value faster and support you throughout the journey.

## Product overview

MAP uses a proven three-phased framework (Assess, Mobilize, and Migrate and Modernize) to help achieve migration goals. The three-phase process is designed to help organizations approach a migration of tens, hundreds, or thousands of workloads. While each phase is a common component of a successful migration, they are not discrete phases, but an iterative process forming part of the overall journey.

## Benefits

- Leverages existing data
- Non-intrusive and secure
- Rapid time to insight
- Lucrative funding opportunities
- Reduce costs & increase business agility
- Comprehensive Business Case
- Trusted AWS Migration Partner

Assess and strategize		Design and plan		Mobilize & modernize/migrate	
Opportunity evaluation & strategize		Workload discovery & planning		Mobilize	Modernize and migrate
Align key stakeholders	Run workload discovery tools	Define target cloud architecture, delivery infra and landing zone	Migration validation testing		
Identify business and technical objectives	Identify application dependencies and groups	Setup migration factory	Check rollback, canary readiness		
TCO and ROI analysis	Rationize workloads using the 7R's of cloud migration	Prepare migration runbook, cutover and rollback plan	Full-scale migration as per wave plans		
Create business case	Document tool recommendation for target infra	Execute pilots	Execute cutover plan		
Cloud readiness assessment	Create high-level migration prioritization and roadmap	Monitor migration KPIs	Post-migration support		
MAP assess phase (and MAP lite)				MAP mobilize phase	
				MAP migrate phase	

## Our approach - Get started with our initial assessment phase

The MAP process supports specialized workloads through comprehensive tooling, services, guidance and training. Thoughtworks has a proven track record of delivering large-scale migrations and having the people, process and technology capabilities available to support customers throughout their journey. Below is our step-by-step approach to the Assess Phase:
